

A Δ auROC on the mouse test set (vs best monoPWM)**B** Δ auPRC on the mouse test set (vs best monoPWM)**C**Spearman $\rho = -0.29$, $P = 0.09$ 

similarity of the baseline human monoPWM
to the nearest mouse monoPWM (Pearson r)

D

gain over the best single monoPWM

● all other TFs ● below the baseline after transfer ● Δ auROC ● Δ auPRC
